“N” .086 S/R Bulkhead Jack

Wood Dale, IL– August 2009 – The Phoenix Company of Chicago introduces a new series of “N” .086 S/R Bulkhead Jacks to its product line.

Phoenix’s “N” Bulkhead Jack features an excellent transition design from the larger “N” contact to the small center conductor of these cables. A compact, “N” Bulkhead Jack for .086 semi-rigid cable, flexible, or tin-soaked braid equivalents.

Features to note:

- Excellent performance to 8 GHz.
- Simple assembly procedure.
- Ideal for antenna connections for low-to-medium power wi-fi access points.
- Stainless steel versions available.
- Minimal chassis interior volume.
- Specially designed diameter transitions for excellent return VSWR loss.
- N-Bulkhead Jack also available in single “D” mounting hole.
- Factory controlled contact height.
- Mil-Std-348 compliant.

Phoenix’s “N” .086S/R Bulkhead Jack is ideal for: **aerospace, base stations, microwave radios, military, rail and mass transit, telecommunications, test and measurement, transmitters, and wi-fi locations.**

*Meets RoHS compliancy standards.

For more information, please contact The Phoenix Company of Chicago at (800) 323-9562.
